Skills

Node.js, React, Tailwind CSS, JavaScript, Firebase, Appwrite, HTML, CSS, MongoDB

Education

Nutan Public School

June 2021 – April 2022

12 Standard Commerce (Percentage: 72%)

Surat, Gujarat

Projects

Natours: Tour Booking Application

[link](#), [GitHub](#)

- I have created a Tour Booking app using Node.js with MongoDB, Mongoose, REST APIs, and NoSQL database.
- Users can see all tours. Users with the 'admin' role have additional features like creating tours.
- Clickable tour boxes allow you to view detailed information about each tour and book the tour.
- Added a payment integration method so users can book the tour.

FastNews: News Application

[link](#), [GitHub](#)

- I have created a news website using React.js for the front end, Node.js for the back end, and styled components for styling.
- Users can log in, sign up, log out, and delete their accounts, and those signed up as "admin" have the additional privileges to create and delete posts.
- All users can view all posts, admins can view and manage posts they created, and regular users can view all posts but cannot create or delete them.
- Users can update their email, name, role, and password, delete their accounts, and get email notifications for any changes or post actions.

Disney + Clone

[link](#), [GitHub](#)

- I have created a Disney Clone using React.js, Firebase, and Styled Components.
- Provide full responsiveness across devices along with login and logout capabilities.
- Clickable movie boxes to view detailed information about each movie

Twitter Clone

[link](#), [GitHub](#)

- I have created a Twitter Clone using React.js, Firebase, Styled Components, and Redux.
- Users can create posts, upload images and videos, and view posts from other users.
- The fully responsive website seamlessly adjusts to different screen sizes, allowing users to easily log in and log out.

LinkedIn Clone

[link](#), [GitHub](#)

- I have created a LinkedIn clone Using React.js, firebase, styled-components, and redux.
- This website includes functionality for logging in and logging out.
- The website supports uploading images and videos, allowing users to view posts made by other users.

Jio-Cinema Clone

[link](#), [GitHub](#)

- I have created a Jio Cinema clone using React.js with the Vite framework, Firebase, and styled-components.
- Full responsiveness across devices with login and logout capabilities.
- Clickable movie boxes to view detailed information about each movie

Blog Application

[link](#), [GitHub](#)

- I have created a Blog App using React.js with the Vite framework, Appwrite, and Tailwind CSS.
- Login and logout functionality.
- Users can view posts created by others and upload their own posts.

Dictionary Application

[link](#), [GitHub](#)

- I have created a Dictionary App using HTML, CSS, and JavaScript.
- Users can easily look up the meanings, definitions, and pronunciations of words. Simply type a word into the search bar and click the search button to get instant results.

Country Information Application

[link](#), [GitHub](#)

- I have created a Country Information App using HTML, CSS, and JavaScript with API integration.
- Users can search for a country name and get all information about that country, including the flag, time, borders, and more.

Weather Application

[link](#), [GitHub](#)

- I have created a Weather App using HTML, CSS and JavaScript with API integration.
- Users can search for a city name and get all the information about the current weather there.
